

Adapting to the Revolution in Biotechnology

An open public lecture by

Dr. Michael Chippendale

Tuesday, May 17, 2011

2:00 pm - 3:00 pm

Deans Conference Room, B1-266

Light Refreshments available
All are welcome!

Dr. Chippendale owns Chippendale Consulting, LLC, based in Columbia, MO. His company advises the planning and design of interdisciplinary life sciences facilities.

With a BSc. degree from the University of Manchester, his MSc. (biology) from the University of Waterloo and his PhD (entomology/biochemistry) from the University of Wisconsin, Dr. Chippendale has an extensive background in insect physiology and plant pathology. He's led research labs in the regulation of diapause and development in plant feeding insects and held such administrative positions such as Chair of the Department of Entomology, Coordinator of Entomology and Plant Pathology, Senior Associate Dean and Interim Director of the Bond Life Sciences Center in 2006 at the University of Missouri.
